### Hagedorn + MGH Launch Moses Lake Office

MOSES LAKE, WA. – Hagedorn, Inc. and MGH Associates, Inc. (Hagedorn + MGH) have joined forces to provide Central/Eastern Washington with full-service Land Planning, Civil Engineering and Surveying services from a new project office in Moses Lake.

Hagedorn, Inc. is an established Washington firm with a 40 year history of delivering Surveying services to clients throughout Washington. MGH Associates, Inc. is a Washington based firm that has been providing Land Planning and Civil Engineering for Northwest clients for nearly a decade.

Hagedorn + MGH have worked together on project teams for several years in the SW Washington and Portland, Oregon Metro areas. As their companies have grown in scope and geographic reach, they discovered that they share key values and traits, such as: responsive client service, senior level involvement, high-quality products, value-added service, community commitment, dedicated, long-term staff, and a similar client base, as well as an interest in establishing a presence in the Columbia Basin.

“It was a natural decision to form an alliance between our firms to serve Central/ Eastern Washington”, says Mike Miller, Principal of MGH, “It is a partnership that enhances our service delivery capabilities and provides the region with full-service, multi-disciplinary Planning, Engineering and Surveying services.”

Hagedorn + MGH bring the capacity, experience and expertise of their combined staff of 57 professional surveyors, planners, civil engineers, CAD technicians, and support staff to land owners, developers, builders, architectural firms, contractors, and public agencies throughout Washington and Oregon. They provide “one stop” services, from initial feasibility analyses through final construction.

Andy Beseda, Principal Surveyor of Hagedorn, adds, “We are excited to be able to offer local clients quality service from our Moses Lake office and to become a part of the local community.”
